Overview

Welcome to ATC

ATC, established in 2018, brings over 23 years of experience in providing and installing solutions for HVAC (Heating, Ventilation, and Air Conditioning) systems. ATC has gained a reputation as a trusted distributor for Carrier, a leading brand in the HVAC industry.

With a focus on reliability, quality, and innovation, ATC offers a comprehensive range of HVAC solutions tailored to meet the diverse needs of its clientele. Whether it's designing systems for large commercial complexes, ensuring optimal indoor climate control for residential properties, or meeting the stringent requirements of governmental projects, ATC is committed to delivering excellence in every aspect of its services.

Backed by a team of seasoned professionals and a deep understanding of the industry, ATC strives to exceed customer expectations by providing efficient, cost-effective, and sustainable HVAC solutions. From system design and installation to maintenance and support, ATC is dedicated to ensuring client satisfaction and fostering long-term partnerships built on trust and reliability.

Vision

Our vision at ATC is to be the premier provider of HVAC solutions in the UAE and beyond, leveraging our extensive experience and partnerships with industry-leading brands like Carrier. We aim to set the standard for excellence in the supply and installation of HVAC systems for Commercial, Residential, Industrial, and governmental projects, consistently delivering superior quality and unmatched customer satisfaction."

Mission

To deliver innovative and reliable HVAC solutions tailored to the unique needs of our clients across Commercial, Residential, Industrial, and governmental sectors, utilizing our extensive experience and partnerships with Carrier and other industry leaders.

To uphold the highest standards of professionalism, integrity, and customer service in all operations, fostering long-term relationships built on trust and satisfaction.

To provide seamless integration of HVAC systems through our comprehensive supply and expert installation services, ensuring optimal comfort, efficiency, and sustainability for our clients' projects.

To contribute positively to the communities we serve by promoting energy-efficient and environmentally sustainable HVAC practices, aligning with our commitment to corporate social responsibility.

- Chilled water FCU
- Free stand units
- Cassette units
- Window units
- Air Curtains units
- Air Purifier

☒ Installation

we can provide installation as we have our sister company AL HELOUL & AL SADEQ

Window & Duct-Free Split Systems

Whether you require a window room air conditioner, wall, cassette, or a floor-standing model, Carrier's range of versatile residential units is easy to install, operate quietly, and offer years of trouble-free operation.

We offer a range of Fixed-speed and Inverter Duct-Free Systems from China, Egypt, and South Korea that are energy efficient, meet the latest regulations, and are designed to suit your needs.

Variable Refrigerant Flow system

Innovation is at Carrier's core. Carrier's variable refrigerant flow (VRF) XPower technology circulates the minimum amount of refrigerant needed for each individual zone to satisfy building load. Since there are no ducts, this eliminates the energy waste associated with the duct loss. A single outdoor VRF condenser can power up to 64 independent indoor units, depending on the system. Carrier offers XPower VRF solutions with the mini VRF capacity ranging from 4HP to 6HP and top discharge VRF ranging from 8HP to 20HP having a combination of up to 56HP.

Ducted systems

With Carrier inverters and fixed speed ducted systems, a wide range of outdoor air conditioners work seamlessly with innovative indoor fan coil units to create reliable solutions that are easy to install and service for a wide range of residential HVAC needs

Rooftops

Carrier's rooftop units are specially designed to provide a compact yet efficient cooling and ventilation solution. Self-contained and easy to maintain, our units are available in a wide range of capacities to meet your facility's requirements. Rooftop units are the ideal choice for commercial or industrial facilities where internal space may be at a premium. These products heat, cool, and ventilate the building's interior using a network of ventilation shafts. Carrier's latest generation of units is lightweight and low-noise. It is perfect for use in today's building structures with minimal noise output.

Air Curtains units & Air Purifiers

Why us ?!

01 Design & Engineering

An in-house team of technical engineering professionals, focusing on all aspects of design and implementation.

02 Project Management

A competent team of project managers, construction managers, MEP coordinators, project engineers, site engineers with skilled technicians and workmen.

03 Testing & Commissioning

Complete testing and commissioning services covering water and air-balancing, pressure testing, chiller commissioning, and ELV integration.

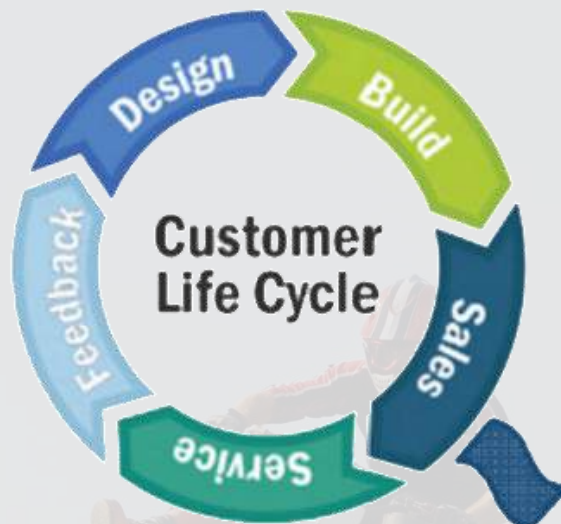

04 After-sales Support

An experienced team geared up to manage and support the client with after-sales service requirements.

Customer life cycle

Add a subheading an independent company, we are shaping the future for our growing customer base, building value for our shareholders, and creating a culture that makes our employees proud to come to work daily. ATC will accomplish each of these objectives by implementing The Carrier Operating System. We are committed to providing our customers with an exceptional life cycle experience with our products and services. We accomplish this through innovative quality designs, lean manufacturing processes, a strong supply base, and responsive post-sales support. We are dedicated to providing our customers with safe and compliant products, delivered on time, that meet or exceed their expectations. We develop our employees to embrace Quality Policy by utilizing our continuous improvement tools and ethics-based culture

Aftermarket Business Unit

Aftermarket Business Unit has a wide presence in the UAE through our specialized and high-skill technicians where we offer all kinds of one-time repairs, planned services, and replacement of HVAC equipment. Carrier offers a wide range of air-conditioning and refrigeration replacement parts, consumables, and allied products.

Customer satisfaction

The main goal of ATC is to provide optimum customer satisfaction. For this purpose, Carrier in the U.A.E., offers state-of-the-art, high-standard HVAC and related products to its valued customers. Its top priority is to provide optimal service to its customers. In every vertical market Carrier serves, it aims to achieve 100% satisfaction, building a strong, loyal, and ever-expanding customer base.
